Innosphere Launches Investor Network

Innosphere now offers exclusive investor network for accredited investors

Colorado – Innosphere, Colorado’s leading incubator for science and technology startups, has formally launched an investor network to support investment into Innosphere client companies. The Innosphere Investor Network is a group of active, accredited investors seeking highly-vetted, investment-ready opportunities.

An existing group of Innosphere investors encouraged the organization to formalize the investor network. These existing investors saw the need to improve the process of introducing startup companies to the investor community, to improve the quality of due diligence materials available for investor review, and to have fewer, high-quality forums in which investors can meet with startup founding teams.

“This is not an Angel group,” said Mike Freeman, Innosphere CEO. “Innosphere leads the due diligence process with each company as opposed to the investors, and carefully manages introductions to the investor network. We think the investor network will not only speed up the funding process for investors and companies, but also strengthen Innosphere’s core programmatic offering for client companies.”

Innosphere’s incubation program supports companies in the bioscience, digital health, energy, advanced materials, hardware and enterprise software industries. After investors sign an expression of interest form, a confidential link is sent to the investor from an investor platform where investors then set up a private profile. Once registered in the network, members will be invited three to four times per year to investor-only events where a limited number of investor-ready companies will present.

Innosphere Client Companies invited to present to the investor network either have existing investor interest, have been accepted into the Innosphere early exit program, or are a portfolio company of the Innosphere Fund.

About Innosphere:

Innosphere is a non-profit technology incubator accelerating the success of high-impact science and technology startups. Innosphere has physical locations in Fort Collins, Denver, and Boulder, Colorado to support entrepreneurs building potential high-growth companies in the industries of energy and advanced materials, life sciences, digital health, hardware, and enterprise software. Innosphere’s incubation program focuses on ensuring companies are investor ready, connecting them with experienced advisors, and making introductions to corporate partners. Once accepted into the program, companies receive customized development plans and ongoing support to ensure they’re getting the know-how to raise the right kind of capital, and all the resources to grow — exponentially. www.innosphere.org
